

Installation Instructions

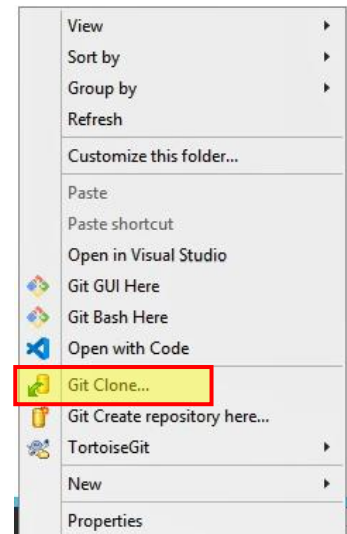

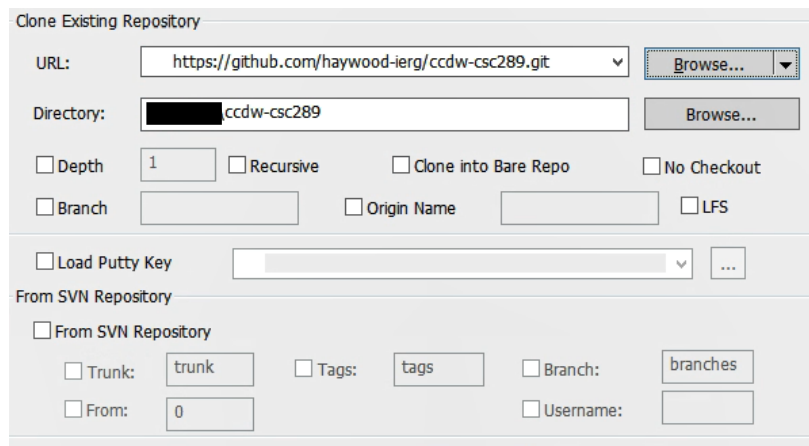

GitHub project site: <https://github.com/haywood-ierg/ccdw-csc289>

Using TortoiseGit:

Using Windows Explorer, navigate to the folder where you want the code folder to be placed. You do not need to create the code folder, TortoiseGit will create that for you.

Right-click in the folder and select **Git Clone...** .

Enter `https://github.com/haywood-ierg/ccdw-csc289.git` into the **URL** field. The **Directory** field will automatically change to include the `ccdw-csc289` folder.

Click **OK**. TortoiseGit will download the code from GitHub into the folder `ccdw-csc289` .

To upload your changes to GitHub, right click inside the `ccdw-csc289` folder and select **Git Commit** -> **“master”** . Enter what changes you are submitting and select all relevant files for these changes and click **Commit & Push**. TortoiseGit will synchronize the changes with GitHub.

If the Commit fails, you may need to **Pull** data from GitHub first, and then **Commit & Push**.
